

ArrowStream Performance Management: View & Manage Your Supply Chain as Never Before

In 2010, ArrowStream OnDemand is making a tremendous advance in supply chain data management and analysis. We are rolling out a comprehensive Performance Management Module for OnDemand to provide clients with a world-class portfolio of supply chain performance monitoring, analysis and reporting tools.

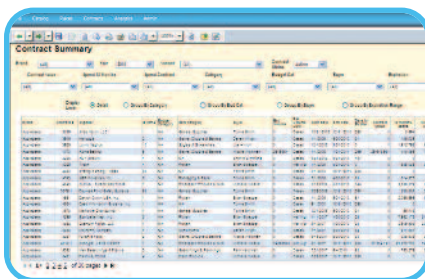

Through the OnDemand Performance Management Module and the insightful dashboards it provides, businesses will gain a new and sweeping level of insight and reporting capabilities. The performance management dashboards and the timely, detailed supply chain data they reveal will fuel more effective, informed decision-making while giving management teams precise insight needed to rapidly increase productivity and enhance efficiency.

To begin the rollout of the OnDemand Performance Management Module, ArrowStream is launching the following supply chain management dashboards:

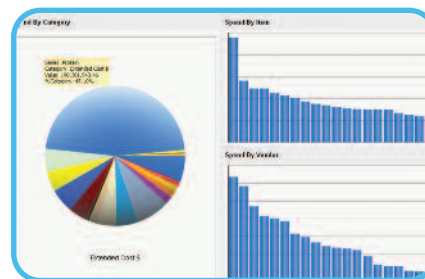

Buy Now and Save!

- Buy Performance Management before Aug 15th and get configuration & training (webinars only) for free
- Buy Performance Management before Nov 15th and get configuration & training (webinars only) for 50% off

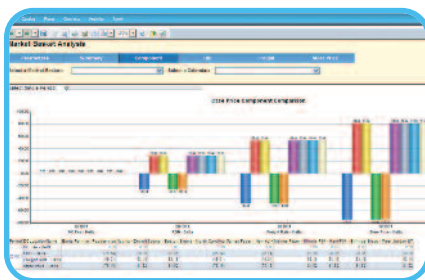

Contract Management

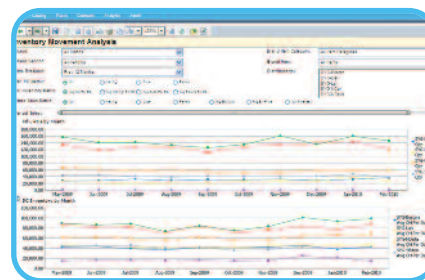

Spend Analytics

Market Basket

Inventory Management

Additional dashboards for key functions, such as: budget analysis, cost control and promotion management, will be added over the course of the year to continue to build on the capabilities of our OnDemand Performance Management Module.
